

Press Release : Launching into HoReCa market

Expand your business opportunity with SandenVendo DESIGN line, while providing an excellent service to your guests.

The new “Design” line of SandenVendo provides a complete solution with three equipment types all brought together with the same styling; Coffee, Snack and Drink. An extremely graceful design combined with proven functionality and reliability of which SandenVendo is known in the market. Considering the increasing costs required to provide nonstop 24/7 catering solutions, vending machines offer a unique solution to this challenge; saving money, manpower and energy costs. Vending machines offer a non-stop 24/7 service with very low energy consumption and an extremely low operation cost.

G-Caffè Design, a Free Standing fully automatic machine : NO BRASS ON BOARD.

It’s simple but functional mechanism is supported with user-friendly and easy maintenance features including the Vendo “all-in-one-site drawer”. Espresso single boiler, double boiler and instant versions are available.

G-Drink Design has been one of the best selling glass fronted cold drinks machines in the market since its launch in 2009. A unique product catcher offers consumer entertainment by swiftly moving in front of the consumer’s eyes delivering the product. Incredibly high reliability of the mechanism is a proven fact.

More exciting news is the launch of the 10 selection XL size - **G-Snack Design**, in addition to the existing 8 and 6 selection models. This extra large product showcase with its endless product choice, is like a shop before your eyes. Fresh food, snacks, drinks and even non-food products can be sold, giving the machine operators an enormous possibility of product assortment for varied location demands and provides vast opportunities.

Be ECO with us!

G-Drink and G-Snack line are also available in “ECO version” with CO₂ cooling unit.
