

17th April 2018

Press Release : Venditalia 2018

Be sure to visit the SandenVendo stand (**Hall 4 Stand No. C17-C19**) at the forthcoming Venditalia Show (6th - 9th June 2018 – Fiera Milano City - Italy).

SandenVendo, known for its long history in manufacturing reliable Vending Machines will be showcasing their latest product range at Venditalia, the biggest Vending event in Europe.

The SandenVendo stand will be introducing the company's latest development; an advanced ergonomically designed vending machine: the **G-Snack Evolution**

This truly user-friendly machine was developed by first thoroughly considering the well-being of the end users. With its vast and well-illuminated delivery box the products are gently handled and swiftly delivered at a central ergonomic height, so that customers do not need to bend down to collect the products they have bought. The delivery area is designed at an optimal power zone position according to ergonomic principals where a neutral posture is maintained while collecting the products, ensuring minimum stress to the body with a simple single-handed operation. It is fitted with a safety sensor; the front shutter will remain open when it detects obstacles. All the features are realized by studying the needs of the end-users and their benefits.

Always considering the environment sustainability, SandenVendo will be presenting **G-Drink HC** version. SandenVendo has met this challenge by pioneering an innovative patent pending process where R290 is safely applied for the current range of refrigerated vending machines.

Moreover, **Caffè UNO** establishes SandenVendo as a real coffee manufacturer with its unique, newly patented features to offer to the market. SandenVendo proudly presents the **SandenVendo Coffee brewer** which delivers authentic espresso flavors and aromas in a way the Italians do best. Also, showing the innovative and patented water injection system for the mixer, a precise temperature management with the lowest possible energy consumption, as well as new ingredient canisters and much more stunning patented novelties.

The state-of-the-art Coffee machine turns the habitual coffee-making ritual into a very special experience.

So, don't miss out. Come and see us, have a chat and try the equipment. See you in Milan!
